Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Stephen Hackney

DC 20036

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

I pay for internet access so I can see whatever I want to see, most often from small operators who would not be able to afford fees for a "fast lane". If I were getting my news from the big operators, I would not even know about this proposal and so would have no opportunity to voice my objection to it. Please don't hand the people with all of the money yet another advantage over the rest of us.

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Ms. Susan K Jolly

The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Dear FCC,

Who developed the internet? If I'm not wrong it was funded by the US Government. The net has worked wonderfully for years in the net neutrality phase. So what gives with handing internet companies the right, much less the ability to install fast lanes and slower lanes? The motive is profit and not the interests of the public. You people need to do your job and ensure that everyone is treated equally and forget the Animal Farm mentality being foisted on us by industry. Thank you. Sincerely, Cesar Hernandez

DC 20036

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. William Norman

Dear Commissioner Wheeler,

I've written regularly on the internet for many years and have digitized and uploaded a large volume of 'fresh to the web' information on American art pottery for the first time. That material is accessed by students around the world every day on my freely accessed not for profit blog. If the big, monied interests saw this material as important I wouldn't be nearly alone in uploading it. But without my efforts this material would have escaped the record much less the web and I hope this free factual material stays available to anyone interested in it without restriction. Thank you for your attention to my thoughts. (Blog cincinnaticum.blogspot.com)

Dear Commissioner Wheeler,

When you allowed the cable corps to offer "paid" TV, you assured us it would not have an impact on "free" (network) TV. Your decision destroyed free TV.

Now you want us to give them the Internet. The answer is NO. If you ignore the people and this protest, I assure you that we will not ignore you, or these greedy corporations. It's actually time for the FCC to listen to the people who use the internet and not to the big money that wants to buy it and own it for *their* profit.

Cease and desist!

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

When the FCC struck down the Fairness Doctrine in 1987, ordinary Americans were, at a stroke, denied free access to broadcast media. We became, not valued actors and participants in the public debate, but consumers of one-sided, business-oriented sound bites which spoke only to the concerns of a tiny minority.

When the FCC then lifted restrictions which prohibited ownership of both print and electronic media in a single market, giant corporations swooped in and purchased virtually all of those media outlets. Today, most of our print and broadcast media fall under the control of just six corporations.

What was once cacophony of divergent ideas and perspectives, quickly devolved into the mind numbing, semi-informative self promotion of six profit driven entities, the aims and goals of which are virtually indistinguishable, one from another. This is not an outcome that would have pleased the framers of the Constitution. Indeed, I am convinced that the Constitution forbids it.

Today, far from recognizing the danger already posed by privately held power over public discourse, the FCC is proposing to allow these same media giants to regulate and sell fast and slow internet access, thereby limiting, yet again, the free exchange of ideas and information, both among the citizenry and between the citizenry and their government.

In simpler times, citizens could gather in public meeting places to discuss concerns of mutual interest. In recent years, the demands on peoples' time in a fast changing society have all but eliminated this practice.

Today, the people's meeting place is the internet. Social media has supplanted the town hall and smart phones, tablets and laptops have taken the place of flyers and leaflets.

Seen in this light, this proposed action by the FCC is doubly damaging to our freedoms. It allows a private entity the means of suppressing dissenting opinions and, by eliminating those avenues of dissent, effectively puts an end to online freedom of assembly. Free assembly, after all, is made a mockery of if, once assembled, all viewpoints are not represented.

These are serious incursions into rights and freedoms that Americans hold sacred. If you take this grievous step, if you bring this issue to a vote and it passes, you will have effectively put an end to the last bastion of free speech.

Consider: We are not allowed to freely air our grievances on radio or TV, newspapers and magazines are largely owned by those who are, at best, indifferent to our concerns and hostile to them at worst, and when we gather in the streets in protest, we are gassed and beaten.

Without a means of free and open expression, not only is democracy in danger, society itself, even civilization is in danger.

Think, commissioners. Think about your places in history. Think about the noble aspirations and ideas over which you are preparing to tread.

Like the moment in time when Rome traded its republic for autocracy, this time in history will be remembered. You will be remembered, and how you and it will be remembered is in your hands, so I beg you, once again ladies and gentlemen, think about the enormous gravity of the thing you are considering. Please, in the name of everything and everyone you hold dear, think.

Sincerely,
Ray Staar

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mrs. Janice Otis

Subject: If you're simply corporate whores,

Dear Commissioner Wheeler,

Could you do us a favor and wear pretty clothing and makeup to work every day? Something really slutty would be nice, and most appropriate. Wear something nice for your corporate daddies?

Everyone - at least, everyone under the age of 40 - is very well aware that pretty much our entire government is for sale to the highest bidder; the fact that things have gone this far - with one or two corporate scumbags on one side, and an overwhelming majority of actual Americans on the other - speaks to how very corrupt what's left of our system is.

Since we're all "up ins" over this, perhaps it would be best to actually listen to the people who pay for the government, rather than to the scumbags who pay bribes to a few Congressones that you're afraid of. You can always try again to slip this past us in a few years.

Are you ashamed of yourselves yet? We're all ashamed of you.

Sincerely,
Nicholas Winset

Dear Commissioner Wheeler,

Will we not be upholding the illusion of democracy any longer?

Those few well-provided will not be the engines of creativity and new ideas.

That will come from those who still strive and share and exchange energy and ideas.

Will it be another step towards a stagnant oppressive slave society?

Or will we acknowledge that we all need each other in various and varying ways?

When we don't share what's in our heads and hearts, we're SLOWING UP the world!

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Stephen Orsary

Subject: Cynicism vs. civic engagement

Dear Commissioner Wheeler,

I currently teach Northwestern University students about civic engagement. To a one, they believe that the Internet allows them to connect across social and national divisions, inform themselves about current events, and facilitate engagement with their government and other institutions. I do not want that belief to be compromised (and a distinct cynicism to be fostered), which is exactly what will happen if you grant cash and clout greater access to this utility than those students -- or other non-corporate-giant types -- have.

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Anna Fenton-Hathaway

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

I use the internet every day, all day long. I communicate with family members, check the news and weather, and sell on Etsy.

And! here is another reason that the internet is very important to me: food allergies and sensitivities. I use the internet to check on food labels for ingredients that I must avoid. I also use all of the recipe resources that are available. My husband loves food, but has a lot of rules about what I cook and bake. He wants to sample everything, and refuses to eat the same meal twice in one month. So, I am constantly looking for new ideas for cooking and baking.

We must keep the internet open and free for everyone to use. As a buyer and seller on Etsy and eBay, an open internet is essential to my business model. Letting big corporations dictate terms to the small entrepreneurs is very unfair. Keep the internet open and free!!!

Sincerely,
Ms. Mary Jeswald

Dear Commissioner Wheeler,

At this point in time, the Internet is how we communicate and share news, information, humor with one another. It is the place people make new discoveries and connect. A place where people agree and disagree. It is a vital part of modern life. Net neutrality is vital to ensure that freedom of speech is not impinged on.

We rely on the internet these days the same way we used to rely on telephones. Broadband needs to be classified and regulated as the utility it is.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. Our education systems depend on the internet. Its amazing what Americans have done- we give away our utilities to companies who then steal away our access to them. Please do not let corporate interests take the free access internet away. Already Comcast has an almost pure monopoly on the internet and cable and fast internet access is already determined by their ownership.

Sincerely,
Ms. Suzanne Stewart

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Ms. Nancy Sossner

You know what our "Country " values are right now? They are about who has the "MONEY" to get their way. This is sooooooooooooooooo wrong

Please keep The American People not for profit Big Guys in mind and keep net neutrality.

Sincerely,

Tina Ruiz

Please don't sell out the people. This is our library, our free speech, our ability to participate in our democracy. It is a place to share ideas, start a business, find out about new things. Don't give it to big corporations. Reclassify it! Protect it! We the people need it. Don't take it away!

Sincerely,
Ms. Veronica Rosenau

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Robin Maule

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Corporate, PAC, and wealthy interests have been involved with the federal government to redistribute wealth and privileges from the poor and middle classes for their own profit and greed. The Supreme Court, which is supposed to maintain neutrality when making court decisions, showed their bias by declaring that corporate money is free speech. When the Supreme Court is made blind to the needs of "we, the people", we need to have some part of the federal government to stand up for all of society by maintaining net neutrality. Give us hope that net neutrality will be protected from corrupting influences that will restrict OUR free speech.

Thank you for your consideration.

Sincerely,
Mrs. Deborah Stapelkamp

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Carl Halbert

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

I support a free and open Internet. People like me use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Contrary to the ideal of an open Internet would be to allow well-financed corporate interests build fast lanes for themselves. This would harm people like me, because corporate voices would always be able to afford special access while independent and non-profit voices suffer.

The FCC must protect net neutrality and reject any plan that would allow corporate gatekeepers to control web traffic. I ask that the FCC recommit to the Open Internet by reclassifying broadband as a utility. This is what should be done in everyone's best interest.

Thank you for considering my appeal.

Sincerely,
Mr. Hamilton Ross

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Dr. Gayle Palmer

Dear Commissioner Wheeler,

Will the Revolving Door, cronyism, and personal greed supersede the will of the Public?

Yes, that's thoroughly the Washington game these days. PLEASE BREAK RANKS with so deleterious a mindset. There is a groundswell of public awareness and clear-eyed observation which soon will accrue to the benefit of those 'Public Servants' who actually serve the Public, and not the 1%.

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Doug Mohr

A MOST CRITICAL issue at stake is how fast lane internet access will allow certain interests to manipulate the US stock market. With unequal access to the trade floor comes an inevitable power over the market itself. WHEN THE MARKET BECOMES UNFAIR AND UNTRUSTWORTHY, A CRASH IS VIRTUALLY IMPOSSIBLE TO PREVENT.

The potential of fast-lane internet access to lead to a crash of the US economy is so severe that it must be PREVENTED. The risk is not worth the gain to certain special interests.

Sincerely,
Mr. Patrick Sennello

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mrs. Theresa Campbell

Subject: No Fast/Slow Lanes!!!!

Dear Commissioner Wheeler,

Today we got a taste of the slow loading net that would be the lot of those of us who are uninterested in commercial sites, and want to connect with people and causes that could not afford the "fast" lane. It was awful--I didn't bother to wait for even one of the downloads. Doing "fast/slow" lanes would basically inhibit free speech in a BIG way. I don't think you really want to go there--all kinds of people, liberal, conservative, libertarian, etc, would be furious. Actually, I am pretty furious you would even consider it, and I am far from alone on this!

.The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Dave Elder

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Furthermore
Dear FCC Commissioner,

I am writing to express vehement opposition to the proposed changes in net neutrality, where people and companies who can pay more get priority access over others who cannot. It is unconscionable to even think that this proposal is good for the normal American consumer. There is no way this proposal can even be good for the overall economy as so much of our growth occurs not from large corporate entities that can dominate a marketplace but by innovative people who start small businesses to spread their ideas. As both parties are fond of saying, "it is the American Way". If this proposal passes, many innovators may not be able to nurture their ideas because it becomes more costly or they can be crushed by some other larger entity with deeper pockets. This proposal might make sense in some free marketeers mind but it is anathema to how small businesses grow our economy. Might makes right must not become the prevailing philosophy.

Increased costs not only stifle the economic engine, it will stifle educational opportunities for millions of people as it becomes more costly to access the internet. The internet is a public good and as such, should be regulated like a utility, Do not fix what is not broken.

In our history, before the overwhelming power of specific lobbyists swayed our Congress, we somehow passed the Sherman Anti-trust Act in 1890 and the Clayton Anti-trust Act in 1914. In both cases, the intention was to ensure an open, fair and competitive marketplace. In 1993, the U.S. Supreme Court further supported the Sherman Act by declaring, "The purpose of the Act is not to protect businesses

from the workings of the market; it is to protect the public from the failure of the market." Destroying net neutrality where the bigger, most well-funded and most powerful entities in this country get priority to internet usage just because they can, will further divide this country and widen the wealth gap that is already too egregious. It is getting increasingly tiresome to see how large corporations can hold sway over the general welfare of the consumer. This proposal will only exacerbate this. Please allow the internet to remain open.

Sincerely,

Tom Sabel
